4. (cancelled)

5. (currently amended) A shingle comprising
a shingle neck;
a shingle body;
a first shingle shoulder disposed on a first side between the shingle neck and
the shingle body;
a first male undercut zone projecting on a top side of the first shoulder;
a second shingle shoulder (4) disposed on a second side between the shingle
neck and the shingle body;
a second male undercut zone projecting on a top side of the second shoulder;
a raised engagement and guide element disposed on an inner side of the
shingle body and in a lower region of the shingle body and disposed remote
from the shingle neck forming a female mold undercut zone (6) and
wherein the first male undercut zone matches the shape of the part of the
raised engagement and guide element on the second side for engaging the
